Summary

CSE undergraduate (NIT Patna, 2025–29) targeting Software Engineering / Full-Stack Developer internships. Builds production full-stack systems (Next.js, Supabase, Postgres) and blockchain applications (Solidity, Wagmi, Chainlink VRF), backed by a C++/DSA foundation.

Skills

Languages	C++, C, Java, Python, JavaScript
Web & Frameworks	Next.js, React.js, Node.js, Express.js, HTML5, CSS3
Databases & Infra	PostgreSQL, MongoDB, Supabase, Firebase, Vercel
Blockchain	Solidity, Wagmi, Chainlink VRF, IPFS
Core CS	Data Structures & Algorithms, OOP, Git/GitHub

Education

National Institute of Technology, Patna	2025 – 2029
B.Tech, Computer Science and Engineering	CGPA: 8.5
St. Paul's School, Sasaram	2025
XII (CBSE)	94.0%
St. Paul's School, Sasaram	2023
X (CBSE)	95.0%

Projects

Arbitrage – Next.js 16, Supabase (PostgreSQL), Firecrawl, Resend, Vercel [Live Demo](#) | [Repo](#)

- Built and deployed a production price-tracking platform monitoring 15 products across multiple e-commerce sources, using Firecrawl for automated scraping.
- Designed a relational PostgreSQL schema in Supabase to persist product and price-history data, enabling trend queries over time.
- Automated scheduled scraping jobs via Vercel cron, triggering Resend-based email alerts on detected price drops.
- Restructured the entire codebase into a modular architecture and authored production-grade documentation for maintainability.

NexusForce – Next.js, Solidity, Wagmi, Chainlink VRF, IPFS, Firebase [Live Demo](#) | [Repo](#)

- Engineered a decentralized escrow and dispute-resolution platform using Solidity smart contracts, with Wagmi handling wallet connection and on-chain read/write operations.
- Implemented Chainlink VRF to select arbitration jurors via verifiable on-chain randomness, removing single-point bias from dispute resolution.
- Integrated IPFS for decentralized storage of dispute evidence, with Firebase managing off-chain session and meta-data state.
- Built a responsive React frontend to reflect real-time transaction and contract status across wallet interactions.

Experience

Open Source Contributor, GirlScript Summer of Code May 2026 – Present

- Merged 3 pull requests under the Open Source Track, fixing frontend bugs and refactoring reusable UI components in collaborator repositories.

Web Team Lead, Robotics Club, NIT Patna April 2025 – Present

- Built and shipped a responsive navigation bar for the official club website, improving usability and layout consistency across devices.

Web Developer, Web & Coding Club, NIT Patna December 2025 – Present

- Built a responsive navigation bar for the 'Hack-O-fest' hackathon website hosted by the club.

Achievements

- Solved 282+ problems on LeetCode ([Adi_2007](#)); Codeforces rating 614 ([aditya.kumar00706](#)).
- Led teams in hackathons including TechSprint, ByteVerse, and ISRO Bharatiya Antariksh Hackathon (BAH).
